

TERMS OF REFERENCE – INDIVIDUAL CONSULTANT

Consultant Job Title: M&E and Adaptation Specialist (S3)- Development of the National Framework for Climate Transparency of Panama Work location: Ministry of Environment, Panama City, Panama General Expertise: Climate change and environmental affairs Category: Programme Management Contractor: Wetlands International, Panama. Executing Entity, CBIT Project.	Project: CBIT
--	---------------

1. Purpose.

Panama ratified the Paris Agreement through Law No. 40 of September 12, 2016, making effective its climate change commitment through its Nationally Determined Contribution (NDC). The Paris Agreement, in its Article 13, raises the need to have an enhanced transparency framework that allows information to be available to assess if the necessary is being done in relation to compliance with the commitments assumed to face climate change. Panama is preparing to fully comply with the transparency requirements set forth by the Paris Agreement (PA) and has identified the following constraints and gaps:

- a) the lack of technical capacity and know-how to generate, manage and disseminate robust and verifiable climate-related data;
- b) limited tracking of climate actions and investments executed outside the jurisdiction of the Ministry of Environment;
- c) the absence of a robust GHG Inventory Management System;
- d) the lack of national adaptation methodologies and indicators;
- e) weak and outdated institutional arrangements for cross-sectoral climate planning, data collection, and sharing; and
- f) the absence of climate considerations in decision making

Recently, the Government of Panama published Executive Decree N° 100 of October 20, 2020 which regulates the Global Climate Change Mitigation Chapter of the Single Text of The General Environmental Law and creates the Reduce Your Footprint National Program for monitoring the low-carbon economic and social development in the Republic of Panama. In addition, under this national mandate, Panama legally establishes the creation of the National Framework for Climate Transparency. The next step will be the publication of an executive decree for the Adaptation chapter.

Overall Activities-CBIT Panama

The Transparency framework under article 13 of the Paris Agreement further enhances existing arrangements, which national commitments and actions were being measured, reported and verified (MRV). The new transparency framework established mandatory requirements to report regularly GHG Inventories and information to track progress on implementing and achieving nationally determined contributions (NDC).

The development of the project "National Framework for Climate Transparency" of Panama seeks to facilitate the collection, management and dissemination of climate-related data in a consultative and transparent manner according to the Modalities, Guidelines and Procedures (MPG) established by the implementation of the Paris Agreement.

The Climate Change Directorate of the Ministry of the Environment, UN Environment and Wetlands International (WI) as Executing Entity, have identified five key elements to improve the generation, quality and transparency of climate information in Panama:

1. Definition of Institutional arrangements for the monitoring, reporting, verification, dissemination, and sustainability over time of sectoral climate-related data;
2. Diffusion of National tools to ensure consistency, transparency, and standardization in the monitoring and reporting of climate data
3. Design and implementation of a public engagement mechanism for the enhanced transparency framework
4. Establishment of a National Platform for Climate Transparency for the monitoring, reporting, and verification of climate-related data.
5. Training for data compilers, suppliers and platform users

2. Objective.

The M&E and Adaptation Specialist (S3) will conduct the following activities, as well as others deemed necessary in the course of the project development:

Ultimate Result of the Service:

- Support the Chief Technical Advisor in the consultation process to gather/share information and conduct consultations with interested public, private and academic sector entities about the National Climate Transparency Platform and its M&E component.
- With the support of the Legal Consultant, develop guides and models of how to develop institutional arrangements in the adaptation sectors;
- Serve as link to NAP Project, in order to incorporate the results and key actors of the "Building capacities for the implementation of the National Adaptation Plan at sectoral level in Panama" project in the National Platform for Climate Transparency (PNTC)
- Support the development of a legal framework for technical assistance;
- Support the Coordinator of Engagement and Communications (CEC) in the consultation process with adaptation actors;
- In conjunction with the Programming and Systems Specialist (PSS), develop guides and processes to incorporate adaptation actors in the PNTC;
- Facilitate the participation of key adaptation stakeholders in a test run of the platform to report on the development of the first Biennial Transparency Report (BTR1).
- Provide sectoral technical knowledge to design a national platform that includes all arrangements, processes, methodologies, and other guidelines developed through CBIT outputs 1, 2, 3 and 4.
- Work in conjunction with the Programming and Systems Specialist (PSS) and CEC, to design a continuous capacity development programme on statistics and methods for data compilers, suppliers, staff and other stakeholders involved with the PNTC Programme, and its web platform.
- In conjunction with the CEC, provide training to public servants and staff to integrate long-term climate strategies, GHG emissions projections and adaptation considerations into policy and decision-making.
- In conjunction with the Programming and Systems Specialist (PSS), the technical team and CEC, develop user guides for data compilers, suppliers, expert users, general public and other stakeholders on the PNTC and its web platform.
- Offer an informed local perspective about climate change adaptation to international experts;
- Collaborate with local entities involved in climate change information management;
- Prepare progress reports;

3. Outputs / Work Assignments (must be tangible and/or measurable)
